Warranty and Liability

Note

The sample applications are non-binding and are not claimed to be complete with regard to configuration and equipment, or in respect of any eventualities. The sample applications do not constitute customer-specific solutions; they are merely intended to be of assistance with typical tasks. Responsibility rests with you for ensuring that the products described herein are used properly. These sample applications do not exempt you from the obligation to proceed with care during application, installation, operation and maintenance. By using these sample applications you acknowledge that no claims for damages can be asserted against Siemens over and above the liability described. We reserve the right to modify these sample applications at any time without notice. Where the proposals contained in this sample application are inconsistent with other Siemens publications, such as catalogs, the information contained in the other documentation will take precedence.

No liability is accepted for the information contained in this document. We accept no liability, regardless of the legal grounds, for damages arising from the use of the examples, tips, programs, configuration and performance data, etc. described in this application example, apart from the statutory liability accepted under the Product Liability Act, for example, in the event of willful intent, gross negligence due to loss of life, injury or damage to health, due to undertaking a warranty for the condition of an object, due to the malicious non-disclosure of a defect or due to the violation of important contractual duties. However, compensation for the violation of important contractual duties is limited to foreseeable losses which are typically associated with this contract unless willful intent or gross negligence exists or if statutory liability is undertaken due to loss of life, injury or damage to health. This shall not involve a change in the burden of proof to your detriment.

These sample applications or excerpts therefrom may not be distributed or duplicated, in full or in part, without the express permission of Siemens AG.

Security Information

Siemens provides products and solutions with industrial security functions that support the secure operation of plants, systems, machines and networks.

In order to protect plants, systems, machines and networks against cyber threats, it is necessary to implement – and continuously maintain – a holistic, state-of-the-art industrial security concept. Siemens' products and solutions only form one element of such a concept.

Customers are responsible to prevent unauthorized access to their plants, systems, machines and networks. Systems, machines and components should only be connected to the enterprise network or the internet if and to the extent necessary and with appropriate security measures (e.g. use of firewalls and network segmentation) in place.

Additionally, Siemens' guidance on appropriate security measures should be taken into account. For more information about industrial security, please visit

<http://www.siemens.com/industrialsecurity>.

Siemens' products and solutions undergo continuous development to make them more secure. Siemens strongly recommends to apply product updates as soon as available and to always use the latest product versions. Use of product versions that are no longer supported, and failure to apply latest updates may increase the customer's exposure to cyber threats.

To stay informed about product updates, subscribe to the Siemens Industrial Security RSS Feed under <http://www.siemens.com/industrialsecurity>.

1 Software Update Service Manager

The Software Update Service (SUS) is the fastest and easiest way of receiving the latest SIMATIC software at any time – automatically and at plannable costs.

Automatically up to date

When you order the Software Update Service for your product, for one year you receive all the upgrades and service packs of your SIMATIC software product delivered free of charge.

The requirement is the latest version of a valid software license.

- **Fast and up to date**
Upgrades and Service Packs are available immediately after they're released
- **Proactive**
You'll get the SIMATIC software product delivered at no charge right to your workplace or be notified automatically about updates via e-mail
- **Transparent**
You can check and manage all SUS contracts via the SUS Manager
- **Manageable cost**
An economical flat annual fee for software maintenance.

You have the choice!

Comparison of SUS delivery types taking the example of three contracts. In this FAQ response we show you how you can easily change your type of delivery.

2 Change of Delivery to SUS Download

Access to the SUS Manager

Simply use your existing Industry Mall login to access the SUS Manager:
www.siemens.com/susmanager

Alternatively you can also call the SUS Manager via the TIA Administrator or via the ALM (Automation License Manager):

- Start the TIA Administrator and select the "Download software" tile in the overview page.
- Start the Automation License Manager (ALM) and in the "Management" view click "Web License Key Download".

Easy management of updates

The SUS Manager gives you a clear overview of your existing SUS contracts.

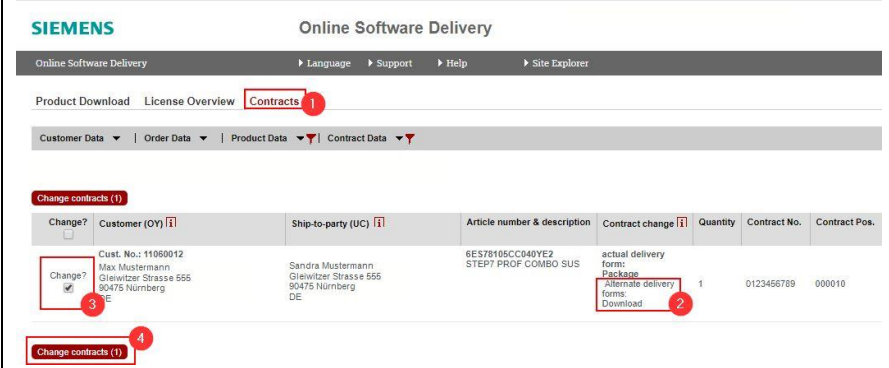

You can filter, select and edit your contracts as required.

In addition to changing a delivery address, in the SUS Manager you can also very easily change the delivery of a SUS contract to SUS Download.

You will receive an e-mail confirming your contract changes and orders.

2.1 Step 1: Select Contract Change

Table 2-1: Select Contract Change

No.	Action																
1.	<ol style="list-style-type: none"> 1. Click the "Contracts" tab. 2. The "Contract change" column shows the contracts marked with "Download". 3. Select the contract or contracts that you want to change. 4. Click "Change contracts" which navigates you to the next processing step.  <p>The screenshot shows the Siemens Online Software Delivery web interface. At the top, there are navigation links for Language, Support, Help, and Site Explorer. Below that, there are tabs for Product Download, License Overview, and Contracts (highlighted with a red box and '1'). A breadcrumb trail shows Customer Data, Order Data, Product Data, and Contract Data. A table titled 'Change contracts (1)' contains one row with the following data:</p> <table border="1"> <thead> <tr> <th>Change?</th> <th>Customer (CY)</th> <th>Ship-to-party (UC)</th> <th>Article number & description</th> <th>Contract change</th> <th>Quantity</th> <th>Contract No.</th> <th>Contract Pos.</th> </tr> </thead> <tbody> <tr> <td><input checked="" type="checkbox"/></td> <td>Cust.
