

## Procedure to be applied when backing-up data (upread) on an SINAMICS CU320 drive system

Open Starter → Close Starter Wizard and help:

# SIEMENS

Select new project → Select project name → Acknowledge with OK

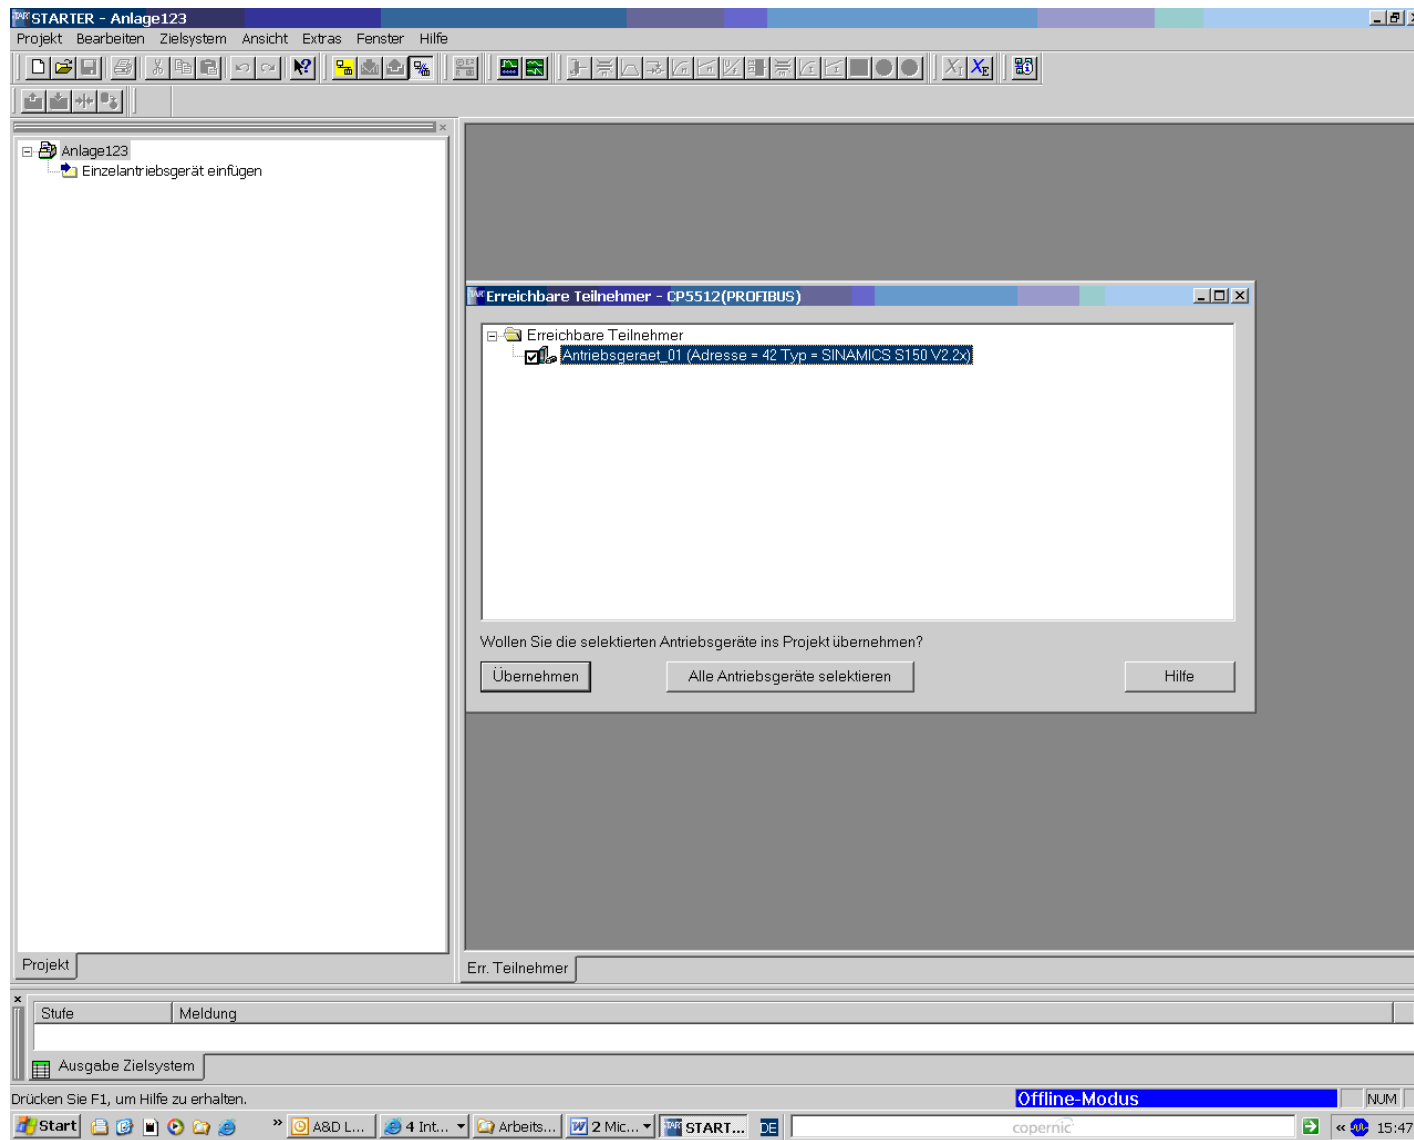

Go online using the icon Connect to target system

Search SINAMICS drive and Accept → Confirm with Yes:

Tick off the drive system that has been found and press the "Accept" key:

# SIEMENS

An alarm appears in the bottom left of the Starter window!

A red icon at the drive unit connection appears above the green connection "Drive \_01":

# SIEMENS

This alarm must be removed by initially executing "Download project into the PG":

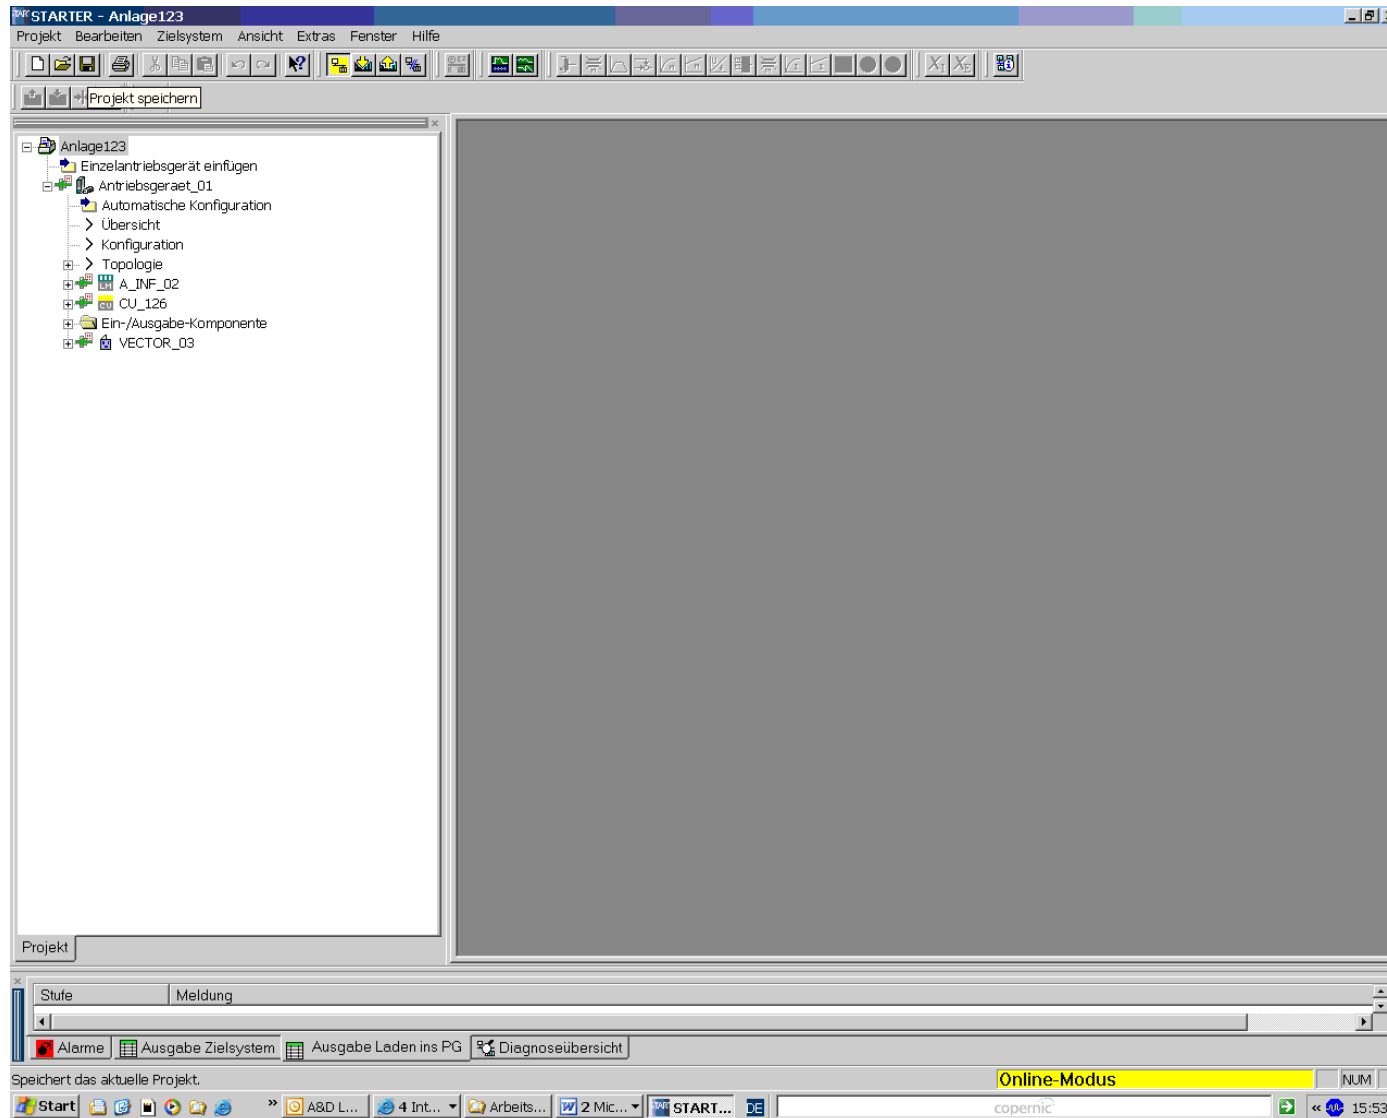

Confirm with Yes:

The alarm is now removed using the function "Save project":

It is now possible to go offline and all parameters are currently saved on the PC.

Subject to change without prior notice.
