SIEMENS

FAQ - Frequently Asked Questions

Product: SITRANS F M MAG 5000 / 6000
Technology: Electromagnetic

Department: I IA SC PS3

Issued: 17.06.2010

QUESTION

Why Does The SITRANS F M MAG 5000 / 6000 Totalizer Show ######## Ml In The Display?

ANSWER

The totalizer is overloaded and the problem can be solved via the "Basic settings" menu set-up.

There are two options to solve the problem:

Navigate to the menu "Basic settings" -> "totalizer"
 1. Change the (,) decimal point position by moving it to the right.

   Example: from x,xxxxxxx l to xxxxxx,xxx l

or

2. Change the "unit" after the value from e.g. l to m3.
